Personal Information

I'm a full-stack developer who turns complex requirements into high-performance solutions, with a strong drive to learn new technologies quickly and deliver effective applications.

- Gender: Male
- GitHub: nicepunn

Education

- **B.Eng. Computer Engineering** Chulalongkorn University, TH. Aug 2021 - May 2025 (GPAX 3.39)

Work Experience

Lodash (Thailand) Co., Ltd: April 2024 - Feb 2025

- Full-stack developer
  - Designed, developed, and managed projects from scratch, leveraging **Next.js** for the frontend and **Node.js** with **Strapi** for the backend.
  - Delivered scalable and maintainable solutions by effectively integrating and utilizing new libraries and tools as required by project needs.
  - Demonstrated adaptability and a strong learning curve by quickly mastering emerging technologies and frameworks to meet dynamic project requirements.

MyCourseville Co., Ltd: July 2025 - Present

- Full-stack developer
  - Built and shipped features for the learning platform. (enrollment, assignments, grading, notifications)
  - Implemented responsive UI components and form flows, meeting accessibility best practices.

Technical Skills

- **Programming Language** ***TypeScript, Python, Golang,*** JavaScript, Java, C++, PHP, Scala, etc.
- **Front-End Development** ***React, Next.js, TailwindCSS,*** Svelte
- **Back-End Development** ***Node.js, Nest.js, Laravel,*** SQL, NoSQL, gRPC
- **CI/CD** ***Github, Docker,*** Kubenetes, Terraform
- **Programming Practice** Software Architecture, Microservices, etc.
- **Cloud service provider** AWS
- **Tools** DBDiagram, Strapi, Postman, Figma
- **Caching/Message queue** Redis, RabbitMQ

Projects

Heathub ***(Next.js | Node.js | MongoDB | Redis | Docker, etc.)***

- Received and analyzed a system architecture and requirements document; translated specifications into a working production-ready system.
- Developed a full-stack platform connecting pet owners with verified pet sitters for pet boarding services.
- Deployed via Vercel: https://heathub.vercel.app

Serper ***(Solo Project | JSON driven UI | Next.js | TypeScript | Tailwind CSS, etc.)***

- Built a functional clone of serper.dev alone, simulating search and result interfaces.
- Deployed via Vercel: https://spotlight-ts-serper.vercel.app/serperMock/auth/playground

Hiwhiw ***(Next.js | Golang | Microservices Architecture | RabbitMQ | grpc, etc.)***

- Developed a smart recipe management system allowing users to manage fridge items, search/filter available menus, and create or modify their own menus.
- Implemented microservices architecture to enhance scalability and maintainability.

CapyKnow ***(LLM | RAG | Late chunking | UX/UI design | system analysis | project management | development | testing, etc.)***

- Capstone project: Integrated a Large Language Model (LLM) into myCourseVille, Chulalongkorn University's learning platform.
- Managed the end-to-end software development lifecycle

Activities

- FE Camp - Activity staff head
- Vishnu20th Camp - Public Relations for a group
- Core team in IMC (Intania Music Club)

- Participate in CUNEX hackathon: Boost up Chula, Sustainable Lifestyle

Hobbies and Interested

- Music
- Learn Japanese language (passed N3 level in JLPT test)
- Watch Animes
